SUMMARY

React Native Developer and Software Engineer with 4+ years of experience building production-ready mobile applications for iOS and Android. Skilled in React Native, JavaScript, TypeScript, Expo, REST APIs, Firebase, and native integrations. Experienced in independently handling multiple projects, developing reusable components, complex audio and subscription features, and performance optimization. Strong experience in third-party integrations, debugging, and collaborating with backend and QA teams.

EXPERIENCE

Software Engineer Jul '24 — Present
Lemosys Infotech Pvt Ltd Indore, India

- Independently handled multiple React Native projects from feature development to production releases.
- Worked on complex audio, subscription, notification, analytics, and native-platform integrations.
- Collaborated with backend and QA teams to deliver and troubleshoot production features.

Software Engineer May '23 — Jun '24
Ideal It Techno Indore, India

- Developed scalable and reusable React Native components for production applications.
- Helped establish the React Native development team and development practices.
- Mentored junior developers in React Native, API integration, and debugging.

Associate Software Engineer Apr '22 — May '23
Young Decade Tt Software Solutions Indore, India

- Started professional development with React Native and cross-platform mobile development.
- Integrated REST APIs, Firebase, and third-party React Native libraries.
- Developed reusable UI components and application screens based on product requirements and design specifications

PROJECTS

Language Academy Link

- Developed and maintained a large-scale React Native PTE platform with complex practice and mock-test workflows.
- Implemented Speaking, Reading, Listening, and Writing modules with dynamic question flows, timers, scoring, and section-level logic.
- Built audio recording, playback, preloading, waveform, duration handling, and audio processing features for speaking/listening modules.
- Integrated Firebase notifications, analytics, Meta/Facebook SDK, TikTok SDK, REST APIs, and native React Native modules

WWIPL — Unlisted & Pre-IPO Investment Platform Link

- Developed the Portfolio Module with real-time profit/loss tracking and interactive stock charts with historical data.
- Implemented secure payment flows for investment transactions.

Mytra — Rider & Social Platform Link

- Developed solo and group rides with real-time GPS tracking, navigation, and live rider locations.
- Built social features including posts, reels, likes, comments, and sharing.
- Developed e-commerce features including product listing, cart, checkout, rewards, order placement, and live order tracking.

Section8University — Property Platform

- Developed a US-based property marketplace with interactive maps, listings, and area insights.
- Integrated real-time chat, map-based navigation, and location-based property information..
- Built e-learning features with video lessons, quizzes, score-based progression, and course completion.
